#### FEED SHORT-PLANT OATS

Corn is scarce and hard to buy. Hay is short. Almost all feeds are short. Benefit yourself and your country by helping meet this great feed shortage by planting plenty of oats and other small grains. Oats are high, but they are dirt cheap compared to the grazing and feed they will give. Oat yields can usually be greatly increased by planting in September.

### PLEASE TAKE NOTICE

When ordering less than 10 lbs. of an item rate. To arrive at the per bushel price (where seed are quoted in bag lots by the bu.), add 25c to the highest price quoted. The 25c pays for the extra bag, extra handling, etc.
